Management Discussion and Analysis

Revenue growth in FY2025 was driven by higher volumes in the Consumer segment, the commissioning of a new plant in the Industrial segment, and rapid expansion of the Services segment. Price increases contributed approximately 3 percentage points of growth.

Profit increased faster than revenue because gross margin improved from 40.0% to 41.0% on better procurement and a richer product mix, while employee and other operating costs grew more slowly than sales.

Segment Performance

The Consumer segment remained the largest contributor, generating Rs. 5,400 crore or 45% of total revenue. The Services segment was the fastest growing, rising 27.1% year on year.

Segment revenue	FY2025	FY2024	Growth (%)	Share FY2025 (%)
Consumer	5,400	4,700	14.9	45
Industrial	3,600	3,100	16.1	30
Services	2,160	1,700	27.1	18
Exports	840	500	68.0	7
Total	**12,000**	**10,000**	**20.0**	**100**

Expense Review

The major expenses in FY2025 were cost of materials consumed at Rs. 7,080 crore (59.0% of revenue), employee benefit expenses of Rs. 1,560 crore (13.0%), other operating expenses of Rs. 960 crore (8.0%), and depreciation and amortisation of Rs. 420 crore. Finance costs were Rs. 240 crore.

Cash Flow Statement

For the years ended 31 March (Rs. crore)

Particulars	FY2025	FY2024	FY2023
Net cash from operating activities	2,150	1,750	1,500
Net cash used in investing activities	(1,650)	(1,350)	(1,200)

Net increase in cash	**400**	**300**	**200**
Cash at end of year	**1,900**	**1,500**	**1,200**

Cash flow from operations rose 22.9% to Rs. 2,150 crore. Capital expenditure of Rs. 1,480 crore was incurred mainly on the new Industrial plant and on capacity expansion for the Services business.

Risk Factors

Commodity price volatility. Raw materials make up about 59% of revenue. Sharp increases in input prices that cannot be passed on to customers could reduce gross margin.

Currency exposure. Export revenue and imported inputs expose the company to exchange rate movements. A depreciating rupee raises input costs.

Interest rate risk. Borrowings of Rs. 3,800 crore, a portion at floating rates, make finance costs sensitive to interest rate changes.

Regulatory and environmental compliance. Stricter emission and safety norms could require additional capital spending.

Customer concentration. The ten largest customers account for 31% of Industrial segment revenue.

Future Outlook and Growth Plans

Management expects revenue growth of 15% to 18% in FY2026. Planned capital expenditure of Rs. 1,800 crore will fund a second Industrial plant, a new distribution network for Consumer products, and expansion of the Services business into two new regions. The company aims to hold the debt-to-equity ratio below 0.50 and to raise Exports to 10% of revenue by FY2027.
